⁴ The proprietary ESG system START combines and aggregates market leading data providers ESG indicators. Given the lack of standardisation and reporting of some ESG indicators by public companies, not all relevant indicators can be taken into consideration. START provides a centralised system whereby Carmignac's proprietary analysis and insights related to each company are expressed, irrespective of the aggregated external data should it be incomplete.

Our Internal ESG Guidelines

Portfolio universe definition

For the Equity and Corporate bond portion of portfolio:

- ▶ Universe reduced by a minimum of 20% through
 - Firm-Wide exclusions
 - Excluding poorly ESG-rated companies (using MSCI¹ and START² scores)³

Integration of ESG criteria

- ▶ Minimum 90% of portfolio holdings (equity and corporate debt) are analysed for ESG risks and opportunities
- ▶ Equities and corporate bonds- ESG research system START² used to centralize raw ESG Data, proprietary scoring and revenue impact for issuers
- ▶ Govt debt- Proprietary ESG scoring system used to monitor and score government issuers' debt through environmental, social and governance factors

Engagement

- ▶ We commit to a strengthened dialogue with companies to improve their approach to ESG issues aligned with our corporate themes⁴

SFDR Category

- ▶ The fund has environmental (E) and governance (G) characteristics. It complies with Article 8 of the EU Regulation No. 2019/2088 under the EU Sustainable Finance Disclosure Regulation (SFDR).

¹MSCI ESG Ratings is a proprietary methodology from MCSI. To arrive at a final rating (from AAA the best to CCC the worst) the weighted averages of the 37 Key Issue Scores covering 10 different themes (4 for Environment / 4 for Social / 2 for Governance) are aggregated and companies' scores are normalized relatively to their industries. These assessments of company performance are not absolute but are explicitly intended to be relative to the standards and performance of a company's industry peers. Carmignac is conscious that by monitoring 37 Key Issue Score the methodology cannot follow all the sustainable aspects from the development of companies but Carmignac ensures that this is the most appropriate one. Moreover, by defining a rating relatively to industry peers, the rating cannot be taken as the objective / inherent assessment of the Company approach in regards of sustainability. ² The proprietary ESG system START combines and aggregates market leading data providers ESG indicators START provides a centralised system whereby Carmignac's proprietary analysis and insights related to each company are expressed, irrespective of the aggregated external data should it be incomplete. ³B or CCC MSCI -rated companies are excluded, as are companies with less than 1.4/10 MSCI Environment and Social pillar score, unless the proprietary score START is A, B or C. ⁴Please refer to our ESG-related themes at https://www.carmignac.lu/en_GB/responsible-investment/our-approach-4743.

On the Equity Side

Carmignac Portfolio Patrimoine: Equity Investment Process

ESG Criteria Are Embedded in Our Decision-Making Process And our Financial Analysis*

Step 1
Setting the
investment
universe

All companies eligible to our investment universe must meet both our internal **ESG guidelines and exclusion policy**.

Step 2
Analysis

Our teams carry out detailed financial and ESG assessments of targeted companies in order to **assign them with our own ESG rating**, implemented through **our proprietary ESG system START**¹. This score will sometimes lead us to invest in a company with an otherwise non-investable MSCI rating; conversely, it will sometimes prevent us from investing in a company with a MSCI rating >B.

Step 3
On-the-ground
visits

We complete this analysis by **regular on-site visits** of production sites and **one-to-one meetings** with the companies' management in order to understand their strategy as well as their long-term engagements.

Step 4
Monitoring &
engagement

Consideration of ESG issues does not end when the investment decision is made. The Equity team continuously reviews the investment thesis of companies held in portfolio, including **a review of ESG criteria & engages with firms on ESG issues**

*All the funds and underlying issuers are not concerned by this statement. For more details, please refer to: https://www.carmignac.lu/en_GB/responsible-investment/in-practice-4744

Sovereign Bonds ESG Approach

ESG integration for Sovereign bonds

Proprietary Sovereign ESG Scoring System for Sovereign issuers

OBJECTIVE

- Identify ESG related risks and opportunities and integrate them in investment decisions

METHODOLOGY

- ESG indicators obtained from public sources such as the World Bank, Oxford University, IMF
- Numerical scoring system that goes from 1 (Bad) to 5 (Good) with 3 as a neutral point for each country.
- Country score composed of the equally weighted average of the three components E, S, and G.
- Each of these components is the average of their sub-components. A Static and Dynamic dimension is included which captures and weights improving (dynamic) ES & G indicators

INDICATORS

Environment

Long-term social improvements that drive growth and stability

- ▶ CO2 per capita
- ▶ Share of Renewables

Social

Capturing investment in climate mitigation and sustainable development

- ▶ GDP per capita PPP¹
- ▶ GINI²
- ▶ Life expectancy
- ▶ Education

Governance

Credit Worthiness, Rule of Law, institution & regulatory quality and control of corruption

- ▶ Ease of doing business
- ▶ Debt as years of Revenue Position
- ▶ Fiscal and Current account situation

MANUAL ADJUSTMENT FACTOR³ THAT MANAGEMENT TEAM CAN USE TO CORRECT ON AN AD HOC BASIS EACH OF THE E, S, AND G FACTORS FOR A COUNTRY

1. Gross domestic Product per capita purchasing power parity

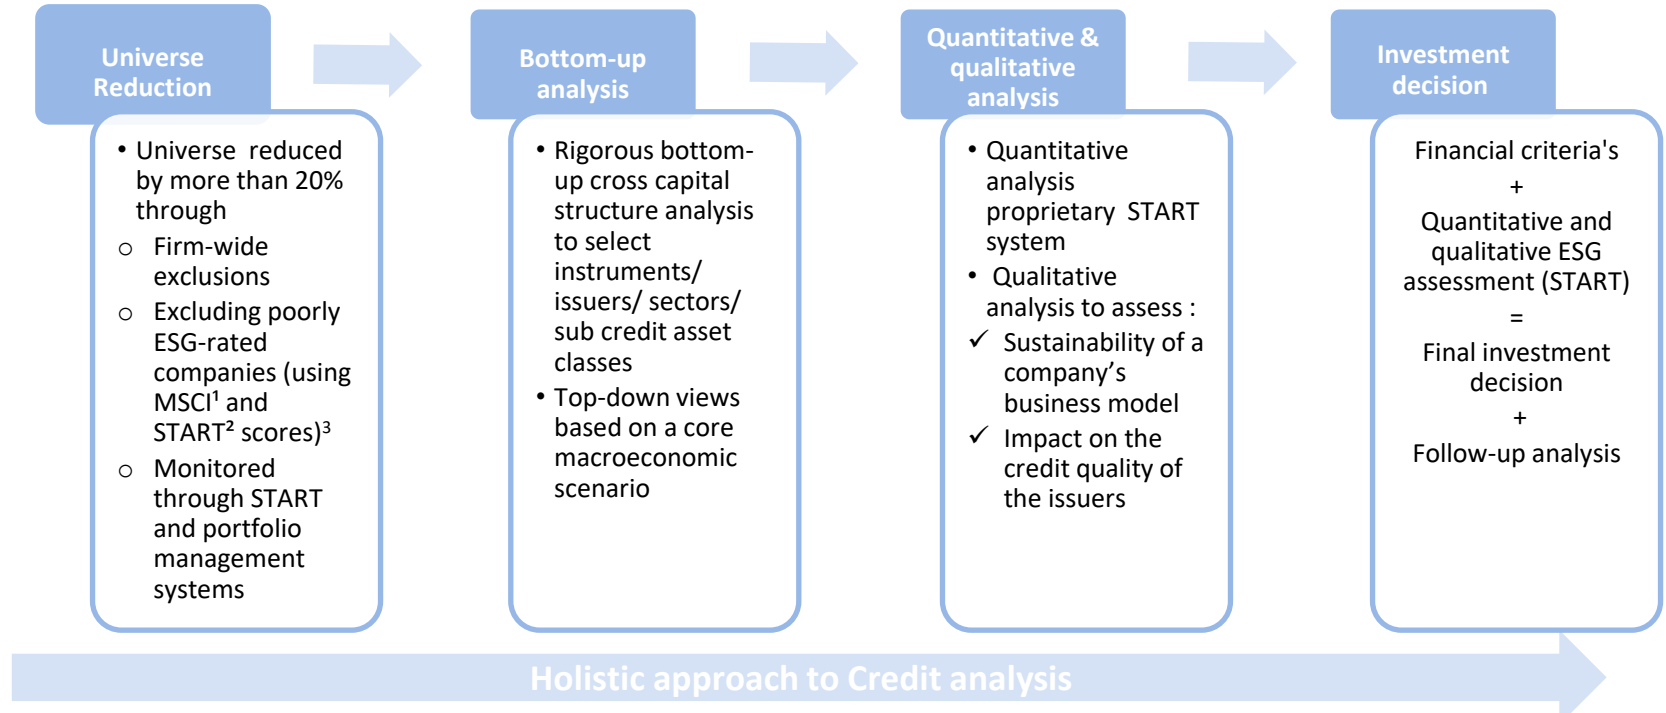

2. GINI: Inequality index developed by Conrado GINI.

3. While the management team is aiming at having a transparent and thus relatively simple index, there are aspects that are not captured. Typically, these would be the impact of recent events not yet reflected in the data or that the data available does not cover fully the situation
